COMPANION MEETING

American Society of Dermatopathology

Dermatopathology Then and Now – Have we travelled?

Sunday, March 2, 2014

1:30 PM - 5:00 PM

CC 33 A-C

Moderator: Meera Mahalingham, MBBS, PhD, FRCPath, *Boston University School of Medicine, Boston, MA*

Course Description:

This activity has been designed to meet the educational needs of general pathologists both in private practice and in an academic setting. Topic was selected in honor of the 50th anniversary of the American Society of Dermatopathology (1963-2013). Entities covered are commonly encountered some perhaps more than others and have been around ever since the inception of the ASDP. Each speaker will begin with an initial description the entity when it was first described to be followed by an update on where we stand regarding the same now.

Upon completion of this educational activity participants should be better able to:

- Recognize select dermatopathologic entities commonly encountered in daily practice
- Recognize the clinicopathologic relevance of diagnosing select dermatopathologic entities
- Utilize state-of-the art techniques as adjuncts in the histopathologic diagnosis of select dermatopathologic entities
